

Project Design Phase II

Functional Requirements

Team ID	PNT2022TMID28956
Project Name	Smart Waste Management system for Metropolitan Cities
Team members	Naveen R.S Jyothi Saai Raam P.N Sriram .V Samuel joshva.S

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR.NO	Functional Requirements	Sub Requirement (Story/Sub-Task)
FR-1	User registration	Registration through e-mail id & Mobile number
FR-2	User confirmation	Confirmation via email Confirmation via OTP
FR-3	Web application	Node-Red -Service
FR-4	Configure to Device	IBM Watson IOT Platform

FR-5	Database	Detailed database of bins and stands
FR-6	Python Script	IBM IOT Platform

Non Functional Requirements

Following are the non-functional requirements of the proposed solution

FR.NO	Non-Functional Requirement	Description
NFR-1	Usability	The reduction of waste
NFR-2	Security	Prediction in bin fulness
NFR-3	Reliability	Effective waste disposal
NFR-4	Performance	Optimize source allocation, reduce running costs and increase sustainability of waste services
NFR-5	Availability	Available for the allocated time by the municipality or the private companies

NFR-6	Scalability	This is very effective in managing waste in big city. Here priority system is used to clean the city all the time without any overflowing dumpsters
